

Submitter: Todd Peterson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

I feel this bill would have a negative economic impact on the state. It would also affect the livelihood of many people who rely on the fur industry as a way to support their families. Also the impact on recreational activities that use the fur. Without a way to keep the fur bearing animals to a reasonable level, they would become overpopulated and create more issues concerning their habitat and way of life.
