

Submitter: Keith Bentley
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB348

Amendments,

Well, SB348 would be a simple straightforward bill until I finally found the proposed amendments. Wow! The whole of these amendments would drastically change SB348 into a different animal. Now this make me very suspicious of the the intent of SB348.

With regard to proposed amendments.

I challenge the notion that that this bill should be declared an emergency. I feel this would unnecessarily hasten and support a controversial and questionable ballot measure that is presently on hold from implementation. We should slow down and carefully consider the impact and validity of such legislation with regard to the State and US constitution. I can't really see the need for the emergency label in this case, please let's NOT legislate from fear and emotion. And we dare not overstep our authority and the restraints and protections established by our Constitution.
