

Submitter: Joseph Mitchell
On Behalf Of: Wildlife management
Committee: House Committee On Judiciary
Measure: HB3390

We have ODF&W. Let them do their job without hamstringing them. This is simply an attempt to ban trapping which is the most effective way to control numbers. Controlling predator numbers helps insure healthy numbers of prey animals such as birds, rabbits, squirrels, etc. Managing these numbers is also vital to the ranching and farming communities that we depend on but are too often harmed by politicians and do-gooders who have no stake in it other than their own ideology.
