

Submitter: Michael Mauro  
On Behalf Of:  
Committee: Senate Committee On Judiciary  
Measure: SB348

Again we see the Oregon Legislature attempting to sidestep the US Constitution, Oregon Constitution, Federal and State Court decisions, the Supreme Court of the United States and the will of the American people they supposedly "represent". This bill is just a conglomeration of the separate failed previous attempts by the same agenda driven politicians to infringe upon the rights of Oregonians. Permit to purchase, discrimination of young adults based on age, egregious fee structures designed to openly hinder the ability of those least able to afford it and severely inconvenience all others, training requirements that are already addressed via long standing requirements, excessive wait times to both purchase and receive a firearm , an application system both cumbersome, invasive, and non-existent that requires an identifying number, and the creation of a database of purchasers with pertinent private information, the list goes on and on. How do you spell "INFRINGE" ? Along with scores of other Oregonians, I will stand against this by any means necessary to ensure an end to what has become an increasingly obvious attempt to further degrade our state.
