

Submitter: Brenden Wedertz  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB3390

We shouldn't pass this bill specifically for fly fishing. We shouldn't use more synthetic materials since they will damage the environment and ecosystem. Fishing offers much needed mental health and a break from a busy world. Keeping the environment safe and healthy is a top priority. Fishing also brings in revenue which the state benefits from.
