

Submitter: Mike Henderson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

I am a part of the fly fishing and tying community here in Oregon. Many materials essential to tying various flies for trout, and steelhead utilize fur. Fishing is a cultural cornerstone in Oregon and to ban the materials used to create flies is a shame to a longstanding tradition. I'm able to support many local businesses who sell dyed and natural hair and fur patches here in Oregon. This bill would have severe economic impacts on those producers and impact the ability for me and other fly fishermen to tie flies.
