

SB348 Written Testimony

SB348 violates and infringes upon State and Federal Constitutional rights.

It's been said that our system of government and founding documents were intended for a moral and religious people. The vast majority of people in opposition to gun-control are not wanting freedom simply for freedom's sake. We believe in common sense, education, safety, personal responsibility, and generosity. The only ones obeying these laws will be the law abiding citizens who don't know any different. SB348 attacks the majority of Oregonians, depleting their ability to protect themselves.

DO NOT advance SB348!
