

Submitter: Kassie Conner
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB348

I oppose these gun grabbing control measures. It is unfair to the law abiding citizens to be made into a criminal due to a free choice they have for their hobby, therapy, livelihoods. Implementing a permit to purchase for either a firearm or ammunition or weapon parts is no different than making a measure an bill that makes people get a permit that allows them to talk either in their house, work, or in public. If the freedom of speech is a protected right just like gun ownership, according to the constitution, so then these actions by our state government and judicial system is being a very biased entity to the people due to contributions and donations from corporations and so on. The state government has fabricated this issue along with others. By not enforcing criminals to be charged or let alone arrested for crimes they have committed. The state has instead gone soft and allow these things to happen and label them as transitional. But on the other hand tax payers of the state have to be at the mercy of the criminals an the justice system. Without having to protect their property, family, and livelihoods, all because some one feelings were hurt over some guns. If I'm mistaken a voice, some words are the main causes into why individuals would not use their rational thinking and go to gun violence, so in return the freedom of speech is as dangerous as the guns they say are. And as a tax payers myself I'm tired of the state government Nickle and diming the tax payers for nothing that shows for the working class. Besides this justice system actively trying to criminalize tax payers for the dear of others who do not educate themselves with more sources than just once source of gun violence stats. I really oppose this measure due to the blatant disregard for safety of the people and I demand a recall of all state officials as well as an audit for the state IRS divisions for the tax payers see where all the state is getting its funding from and where is it all going. So old programs that are not working, those accounts can be re allocated to these new taxes that keep getting added or the fact that doing the audit will then hopefully find the snakes that are siphoning money away from the tax payers for their own corruption. When and how can the people of the state audit the tax system.
