Committee: Senate Committee On Education
Measure: SB409

I support SB409.....why wouldn't you? Back when I accidentally put my daughter in kindergarten in the Lake Oswego Schools I asked to view the curriculum. The school was nice about it but I had to go sit at the school & review it . As a working parent w/ another young child who I had to bring along I was not focused on being able to actually read throughly the curriculum.

I had to find a sitter & go back a second time . When I went back I discovered LO wanted to teach my kindergartener about inappropriate topics.

Another thing I discovered w/ our mistake to put our kindergartener in the public school system how HARD it was to know what she was being taught. I wanted to support her at home & continue on conversations w her about her history lesson or the new game she played in PE etc....this info was impossible to obtain. I felt a real divide b/n her, me, & the school it was an uncomfortable feeling.

Just put the curriculum online , it would make for a lot less upset parents.

Thanks
Josie Alexander
