

Submitter: Wallace Rogers

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB270

Education is corrupt and failing badly. Focus on fixing Education before adding more. Don't expand service when you constantly fail to deliver on the scope you already have. After it is fixed and shows noticeable continuous improvement, you have earned the right to expand upon it.

This 2023 education system us way out of control and they cannot manage what they have appropriately. Focus on that first.
