

Submitter: Dave Hendrie
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

While I understand the drive behind this bill, I believe some exemptions should be included. Educational institutions should have the ability to purchase fur products for historical teachings on trade etc when Oregon was settled.

Also, I'm a fly fisherman and I tie my own flies. These flies are constructed with thread, feathers and various furs (mainly rabbit, squirrel, mink) to create impressionistic flies for trout to eat. I would ask an exemption to this law would be added to allow fur to be sold for this purpose.
