

Submitter: Granella thompson
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB348

I believe this bill will discriminate against the poor who have as much a right to exercise their 2nd amendment rights which SHALL NOT BE INFRINGED more than any other group due to the additional cost.

I believe this bill will discriminate against recognized adults old enough to go to war and use guns, vote, but would not be allowed to purchase a gun. If they are adults and in good standing (no criminal record) their rights should not be hindered in any manner by government.

Measure 114 can't be implemented, so why make more laws you can't enforce? This will end up in court and in most areas of the state it will not be able to be enforced as this is an unfunded mandate.

NONE OF THIS MAKES US SAFER!!!! Guns are tools, knives are tools, rocks are tools, none are used as often as bare hands for strangulation, blunt force trauma such as beating with a bat, running over someone with a car. If you want safe streets, arrest criminals, try criminals, lock criminals up and KEEP THEM THERE if they are guilty of serious assault, rape and murder. We need a LOT more police, we need to support police instead of condemning their every move, we need good District Attorneys instead of the ones all too frequent in large cities that do everything to turn the criminals back out onto the streets to commit more crimes and victims. We need theft taken seriously. We need vandalism stopped. Passing laws that criminals will ignore does nothing. A good guy with a gun is badly needed to stop a LOT of crimes that could otherwise explode into mass shootings. Gun free zones attract those desiring to kill many people, and help them accomplish that goal. There should be no back dating, all it does is attempt to trap people exercising their rights.
