

Submitter: Michael Bennett
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

Although I understand the intent and reasoning behind House Bill 3390, please consider an exemption for the flies and fly tying materials used in fly fishing. Most fly tying materials, and certainly those that make-up the majority of those used, are byproducts of other industries or activities such as hunting. Examples are deer hair, duck and pheasant plumage, etc. Thank you very much for your attention and consideration of this exemption.
