

Submitter: Janae Schiller

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: SB408

I strongly oppose OHA having the authority to dictate to a large body of health professionals. As a massage therapist, I have strongly disagreed with their arbitrary and unscientific rules and mandates that have compromised the health of the population. For instance, the gold standard of scientific data, Cochrane, published what we already knew: masks do not help to prevent the spread of respiratory illnesses in community settings. The use of masks instilled fear in the public as well as it induced tribalism and virtue signaling, changing our society permanently as well as it destroyed interpersonal relationships due to the controversy. They also tried to force the vaccine upon health professionals, even though the data is showing widespread disability and high mortality rates post introduction. People are dying suddenly. It also has been shown in scientific studies to increase your risk of contracting COVID by 44%, so it obviously has done nothing to curb transmission, thereby proving how arbitrary and unnecessary the mandates were. The OHA is authoritarian and biased, influenced by big pharma. They are unelected officials who do not have the insight, knowledge or wherewithal to oversee such a broad range of medical professionals. The OHA is a dangerous, power hungry organization and they must be stopped.
