To whom it may concern:

I am submitting written testimony in opposition of SB 408. No one, especially unelected bureaucrats, should determine or limit what kind of care a patient is able to seek. As an individual who found lasting pain relief and healing through naturopathic and chiropractic medicine following a horrific car accident two year ago, it is very important to me that people have access and choice regarding medical care. Had I followed the traditional medical route, I do not believe I would have the restored quality of life I am extremely grateful for today.

Thank you in advance for protecting patient choice. No on SB 408.
