

Submitter: Susan Dunfee  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB409

I absolutely support this legislation! Schools are not the authority over children, the parents and/or legal guardians are the authority over their children, and as such, should have full and complete access and control over the curriculum and course of study in their children's schools. Having this information available online makes access more equitable for all families, especially those with transportation issues and/or work schedules that prohibit them from accessing information that would only be available in person during standard business hours. Vote yes on this legislation!
