Measure: SB348

Members of the Senate Judiciary Committee,

I am writing to you in firm opposition of SBA 348! This newly proposed law would provide no benefit of increased safety for our community and the increased fees are discriminative of our minority groups. To back-date the criminalization of the purchase of high capacity magazines is simply unjust. This newly proposed law will be challenged in court due to opposing our constitutionally protected rights. Additionally, Oregon does not have the resources to execute and maintain this type of system, there is no point in pretending this may ever become a reality for Oregonians.
