

Submitter: Wade Campbell
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB348

An “emergency” action is not necessary in this case. A poorly written measure (114) is currently moving through the legislative process. The majority of people in Oregon do not agree with measure 114 or this new bill or any emergency act related to this subject. This appears to be an attempt to circumvent the established voting and legislative process to impose the will of a few in our State. It should concern everyone that any group is willing to attempt anything to prevail regardless of the voting populous’ stance on the subject.

The required infrastructure and means to follow a proposed law needs to be fully in place well before trying to force law-abiding citizens to follow said law.
