

Submitter: Jay P

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

Why would we want to take choices away from our citizens? Seems crazy to me, there are many legitimate uses for animal products, fur is no exception, Leather, fur, meat, milk are all products that support Americans across the country, and people across the globe. If you continue to allow regulation by feelings instead of facts we won't have any choices left. I urge you to vote this down and allow Americans the freedom we've been granted by God, and the constitution. There is zero biological reason for this, There is zero financial reason for this. There is zero moral reason for this.
