

Submitter: Reese Mason

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

This bill is bad for all residents of Oregon because it is telling everyone what they can and cannot buy, wear or use. This bill will severely limit the conservation of wildlife in Oregon because if it makes it illegal to buy or sell fur the trappers of Oregon will not be able to trap fur bearing animals and help with wildlife conservation. Fur is a renewable resource and eco friendly. The harvesting of fur bearing animals is strictly controlled by the fish and game to help promote healthy populations and prevent overpopulation. If this bill passes it will result in overpopulation and cause a imbalance in the ecosystem which will lead to animal human conflicts as well as increased deceases in the population. I strongly oppose this bill for many reasons but the 2 biggest reasons are that it hinders wildlife management and it limits every citizen write to use a sub-stainable resource
