

Submitter: Michelle Perry  
On Behalf Of:  
Committee: Joint Committee On Transportation  
Measure: HB3202

IN SUPPORT OF HB 3202

I hope to count on your support of the Night Skies bill, HB 3202, which will create standards to limit and mitigate light pollution across Oregon.

This is not a new concept, and in fact other states have already implemented such measures. Light pollution can disrupt carefully choreographed ecosystems including impacting animals' feeding habits, migration, and predator/prey relationships, and can have far-reaching effects on human health as well.

It's easier to protect our night skies while they're still here than to try to repair them after they are gone!
