

Submitter: Charles Lawson

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB348

There has been a constant barrage of officials and anti-gun advocates, blaming the guns for the violence that has occurred over and over. It is not the gun or firearm that is the cause of the violence it never has been. The 2nd Amendment is a God given right and shall not be infringed, means no Law can be written that is contrary to the 2nd Amendment. These laws that these people are trying to enact, not only are unconstitutional, they are not going to help the problem. How about enforce the laws already on the books and treat the true problem of the criminals, instead of make law abiding citizens, criminals. This is a simple solution to fix, but the gov't doesn't want to fix it, because they want to control the people, the only way to control people is to disarm them. They have been driving down this road for decades. Stop trying to destroy the rights of "WE the People". This Bill Is UNCONSTITUTIONAL.
