

Submitter: Linda Kelley
On Behalf Of: 350 Eugene
Committee: House Committee On Climate, Energy, and Environment
Measure: HB3378

I am writing in support of HB 3378. It is common sense to support Resilient Hubs in this time of increased natural disasters. The focus on regional control on decisions regarding what is needed and works best in various regions is important. Resilient Hubs can be crucial in supporting hospitals, police and fire services, schools that can act as emergency shelters and other community services. We must seize this moment now to develop legal and logistical infrastructure that can make use of federal funds while they are available and before that budget is used up by other states who may move quicker and already have infrastructure in place. Please pass this immediately. Thank you for the opportunity to submit testimony. Thank you for your work bringing this important bill forward.
