

Submitter: Darla Salchenberg
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB409

I am in support of SB 409. Parents should have an accessible option to view the course curriculum online. Many parents aren't able to easily schedule a meeting to view this material at the school, and the ability to view online would keep the parents aware of the curriculum being taught in class. Teachers and the school district are not the only adults that should be aware of what is being taught to the kids, parents need to be aware too. Parents should have knowledge of curriculum and be able to view and access this information in a transparent and easily obtainable online format.
