

Submitter: Jean Manning
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB409

To my representative's of Oregon,
I am in support of the SB409. With the technology that is available now there isn't any reason why parents should not be able to go on line and see what their child is being taught. It would be more cost effective to the schools to have it on the web site. If I had a child in school I would be at the school taking up time of the staff, my own time, plus I would be wanting a copy of the information which would be making another expense of making the copies. I can't think of any reason why the information should not be on the website for parents to see at their convenience.
Thank you for your time,
Jean Manning
