On Behalf
Of:

Committee: Joint Committee On Ways and Means Subcommittee On Natural
Resources

Measure: HB5018

? Oregon DEQ has an obligation to maintain a fully functioning Title V air permitting program.

? It currently takes over 300 days to process a Title V application, which is not good for

business and potentially puts communities at risk.

? The Title V program is essential for ensuring the largest emitters comply with all state

and federal requirements to protect communities and provide information to the public.
