

Submitter: Rachel Cairns

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3202

Please vote FOR the Oregon Night Sky Protection Act. This legislation would protect both birds and animals. Migrating birds do much better in their travels without distracting light sources. I believe that Oregon should lead in positive and protective environmental policies. Having dark skies protected also helps with human health. People sleep better with dark skies. Oregon can have both the safety of lights (with the light shielded toward the ground) and the improved health of bird migrations. Please vote FOR the Oregon Night Sky Protection Act! Thank you.
