

Submitter: Gerald Smith

On Behalf
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB2659

Climate change occurs but it does not require us to declare an emergency. Most of the "scientific evidence" .of a coming catastrophe comes from those who benefit from scaring the populace. The requirements in this bill assume we must act radically and fast. For years those people have predicted the sky will be falling in 5 years. How many 5 years? 20 years ago scientists were worried about global cooling and a coming ice age.
