

Submitter: Antonio Nissen

On Behalf
Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB3086

For HB3086, please adopt it in its form with the -4 Amendment. A river basin, being a living system requiring balance throughout, can only be as strong as the weakest link. One weak link can destroy the whole ecosystem. Dividing by Congressional Districts is the quickest and easiest way to introduce a weak link that is not in harmony with all the ecological dependencies. The only way to ensure all subsystems support the whole ecology is to manage on the river basin scale.

Thank you.
