

Submitter: Jane Monnette

On Behalf Of:

Committee: House Committee On Higher Education

Measure: HB3499

I absolutely oppose this legislation - it's bad enough that my property taxes pay for public education that is not teaching our youth the basic reading, writing and arithmetic that is critical to their success in middle and high school. Our tax dollars should NOT be used for funding total college or community college education. Most students are not prepared to make a decision about their higher education when they get out of high school and should be required to work or look at trade education before continuing to college. This is socialism at its worst. VOTE NO.
