

Submitter: peter hall

On Behalf Of:

Committee: House Committee On Revenue

Measure: HB3011

Although it is important to allow local government the leeway to provide tax incentives to businesses, it is important that it be a transparent process that includes other local communities that could be affected by these tax breaks, such as loss of revenue or their own business incentives. The people of a region need to know the pros and cons of every proposal so that the residents of the community can have adequate knowledge and input into the proposal.
