

Submitter: Sandra Grasty
On Behalf Of:
Committee: House Committee On Education
Measure: HB3198

Having been in education for many years, teaching ELA, remedial, reluctant learners, and being a School Psychologist, I am concerned about the “programs” being utilized already. Putting students who struggle on computer based programs or “canned” programs is not best practice. I support any changes that do not include the latter two options, but rather programs that deal with the whole child.
