

Submitter: Stephen Frey

On Behalf Of: Business owner who has used SOS site often

Committee: Joint Committee On Ways and Means Subcommittee On General Government

Measure: HB5035

I find the current site very effective and easy to use. I hope we keep the SOS site effective but am not wishing additional services to be added. My concern is the escalating costs that come from services that serve so few businesses or individuals. I hope that we can be thoughtful that we fund needed services/resources for the SOS that are needed by the majority of users (60% of current users) not small interest groups.

Thank you for listening.
