

Submitter: Andrew Bellamy

On Behalf
Of:

Committee: Joint Committee On Ways and Means Subcommittee On General
Government

Measure: HB5035

I oppose this budget proposal as many items are frivolous and the current budget has not been used efficiently. Oregon's history of technological improvements have proven that there is a huge black hole regarding staffing abilities. It's quite sad we don't have more success considering the trove of high-tech businesses that operate in the state. The solution is not just throwing more money at the problem, it's gutting the current team and starting with a new one that is less focused on politics and more focused on progress.
