

Submitter: Dan Siger

On Behalf Of: Oregon Corporation Division

Committee: Joint Committee On Ways and Means Subcommittee On General Government

Measure: HB5035

To Whom It May Concern,

I hope this message finds you well. As a concerned citizen, I am writing to urge your support for the Oregon Corporation Division's budget request. The Division plays a crucial role in facilitating business registration and services for our state, and it is imperative that we provide the necessary resources to enhance its online platform.

Currently, the Division's website is not user-friendly, leaving many individuals struggling to navigate through essential information and resources. A confusing interface and rudimentary HTML form submission process hinder the efficiency of the Corporation Division's services. In order to better serve the people of Oregon and maintain a thriving business environment, it is essential that we invest in modernizing and simplifying the website.

By approving the budget request, we can create a more accessible and efficient platform, enabling the Oregon Corporation Division to meet the growing needs of our state's businesses and entrepreneurs. This investment will not only boost the local economy but also reflect our commitment to fostering innovation and promoting a vibrant business landscape.

Please support the Oregon Corporation Division's budget request and help us make a positive difference in our state's business community.

Thank you for your time and consideration. Your commitment to improving the lives of the people of Oregon is greatly appreciated.

Sincerely,
Dan Siger
