

Submitter: Linda Hanna

On Behalf Of:

Committee: House Committee On Education

Measure: HB3198

I am extremely disappointed In our failure to educate our student's. They graduate from high school and can't even sign their names. We have forgotten the basics and most of the children to teach junk they don't need. Who cares about our children and their future. It seems our educators don't care. Let's get back to the basics of reading, writing and arithmetic first and let the ones interested in the junk learn that. We have forgotten the students in the education frenzy.
