Wildlife Habitat Conservation and Management Program (WHCMP)

- Created in 1993, amended in 2003
- Offers a property tax incentive to private landowners who want to voluntarily conserve wildlife habitat
- Addresses Oregon Conservation Strategy goals

Photo: Jason Faucera

□ Non-participating Counties:

Baker, Clatsop, Coos, Crook, Curry, Gilliam, Grant, Harney, Hood River, Jackson, Jefferson, Josephine, Klamath, Lincoln, Linn, Malheur, Tillamook, Umatilla, Union, Wallowa, Wasco

■ Participating Counties

Benton, Clackamas, Columbia, Deschutes, Douglas, Lake, Lane, Marion, Morrow, Multnomah, Polk, Sherman, Washington, Wheeler, Yamhill

HB 2527

- Changes to make the WHCMP a more sustainable and effective conservation tool
- Less prescriptive monitoring and compliance burden on agency
- Greater flexibility to focus enrollment on conservation priorities

Photo: Hilary Doulos

A close-up photograph of a red-capped woodpecker perched on a tree branch. The bird has a bright red crest, a white forehead, and a black face with a white patch around its eye. Its body is black with white streaks on the chest and belly. The background is a soft, out-of-focus green.

Wildlife Habitat Conservation and Management Program

SWCD Perspective

Jason Faucera
Clackamas Soil & Water Conservation District

WHCMP is important to preserving and restoring Oregon Conservation Strategy Habitats

- Significant portions of remaining critical habitats reside on private lands
- Much of the remaining oak habitat is at threat of loss to conversion or development
- WHCMP has been unavailable since 2017 in North Willamette Watershed District

Public benefit at the expense of private landowners

Managing for habitat...

- can be expensive
- generally, does not generate significant income or increase property value
- puts landowners at risk of losing agriculture or forestry deferrals and being assessed back taxes

WHCMP can solve the deferral loss and offset the cost of maintenance

- WHCMP can help to offset the public/private benefit disparity
- Counties have shown they see value in WHCMP by opting in
- It provides landowners the flexibility to manage their land for critical habitats

Streamlining WHCMP resolves program challenges

- Discretionary monitoring and landowner attestation will free up time for new enrollments
- Prioritizing projects based on Oregon Conservation Strategy habitats would increase impact for the capacity expended
- SWCDs and others can provide the technical advice needed to help enrollees be successful
