Committee: House Committee On Climate, Energy, and Environment

Measure: SB543

I am writing in support of SB 543. Plastic pollution is a huge environmental and health issue. Polystyrene foam is incredibly problematic - the main ingredient styrene poses serious health threats, it doesn't biodegrade, and because it floats it travels easily from our cities into our oceans.

Please pass this bill prohibiting food vendors from using polystyrene foam in food containers. There are plenty of other options for food containers, we need to move away completely from single use plastic containers.
