Committee: Joint Committee On Semiconductors

Measure: SB5

I attended today's Cleantech symposium sponsored by Technology Assn of Oregon and Climate Curious. There is deep concern that R&D funding for economic growth represented in SB 5 ignores the opportunity to establish Oregon as a center for clean technology and the clean energy economy that is coming. I would like the state to carve out funding to support startups and innovation in these areas, not bet the farm on chips. Thank you, Merry Ann Moore
