

Submitter: Ramesh Manuvinakurike
On Behalf Of:
Committee: Joint Committee On Ways and Means
Measure: SB5506

Dear Joint Committee On Ways and Means,

My name is Ramesh. I live in Hillsboro Oregon (House District 30, Senate District 15). I'm currently a Research Scientist at Intel working on Artificial Intelligence. I'm usually passive when it comes to participating in political discourse until a very important matter is on stake. This is one such matter. I am writing this in support of SB 576. I like to believe we still live in a kind society where each person has freedom to pursue happiness and opportunities. This includes people irrespective of health conditions & disabilities. Career growth and success is an important part of our lives. In the current day an average American spends 90,000 hours at work over one's lifetime. Major part of our lives happiness and worthiness is derived from the work we do. Medicaid coverage, insurance coverage is an important factor which allows us to continue working in our daily lives and achieve our life goals and eventually create a society which is better for everyone. With this in mind, I'd love to support SB 587.

Ramesh
