Measure: SB5506

The Oregon State Fairgrounds is a well known and easy to get to space that is perfect for an emergency center. However, designating the fairgrounds (as several counties have already done with their fairgrounds) as an emergency and evacuation center requires some investments to make it fully capable. Please pass the funds appropriation for infrastructure improvements as a regional emergency and evacuee center for the Oregon State Fairgrounds. As the last few years show, small investments in preparation and readiness is beneficial. This investment will do the mid-valley a lot of good.
