

Submitter: Mark Cosby

On Behalf
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: HB2490

Howdy Senate Committee

The election process should be "transparent" yet it is not, as I have been learning.

If we cared about "transparency" we would have done a forensic audit of the machines (this has been blocked by the courts).

In 2016 Democrats were sure elections were rigged... and in 2020 voters seen more screw ups than the hanging chads of florida.

Florida counts 3 times the ballots Oregon does in a day... Oregon's process is about 40 days.

NAV voters are a mix of distrusting the system and not even participating in the process, (funny they are the biggest voter block in Oregon).

Maybe we should just go back to in person voting, in the presence of precinct workers who have known us most of our lives.

Thanks for your time.
