

Submitter: Terra-Sol Landscaping
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: HB2098

The current bridge is functionally obsolete and highly vulnerable to earthquake damage.

The bridge is not adequate for current transportation needs, much less future needs. Traffic on the bridge suffers from heavy congestion from seven to 10 hours on most weekdays.

The bridge is vital to the region's economy. More than \$70 million worth of freight crosses the bridge every day.

The bridge lacks adequate pedestrian and bicycle access.

The Legislature must approve \$1 billion for the project to remain eligible for \$3 billion in federal funding for the project.
