

Submitter: Keltis Hall
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SJR33

I strongly oppose SJR 33!

This amendment neglects to protect human life in the womb, families, and the individual.

First, a child in the womb is a living being and is separate individual from his or her mother. Therefore utilizing abortion at any stage of a child's development is murder. This should not be protected by the Oregon Constitution.

Secondly, "gender affirmation" has been proven to cause irreversible harm to the individual. People are born either a male or a female. Trying to change one's gender medically causes harm to the individual. Something that causes harm to Oregonians should not be protected by our Constitution.

Finally, traditional marriage is important for healthy families and a health society. Removing or altering this in our Constitution is likely to impact the health of our state.
