

## Beavers in Pecan Creek

Pecan Creek and a new Beaver family

What to do, Oh, what to do?

Do we Trap 'em and remove 'em

Make beaver slippers or eat beaver stew?

123 years of family stewardship

On 1<sup>st</sup> people's land up from Waluga Bay.

We felt the beaver family

Had a God Given right to stay.

They started by slowly improving  
the creek that was nearly dry,

Through their eager beaver work  
Pecan creek waters now running high.

Though they used limbs and branches  
To build their dams and also dine  
Decided it might be real delicious  
to sample our wine grape growing vines

Who on earth could help us  
To Co-exist with our new-found friends  
We called The Beaver Coalition for assistance  
And great knowledge they did lend.

They provided a management system  
A solar electric fence that's oh so dandy  
The beavers learned in a few quick days  
Our vines were not their Vegetative Candy

House Bill for beaver legislation  
That can be our beaver fix  
To help secure a brighter future  
Keeping eco-friendly beavers in the mix

Our state symbol should be protected  
Should be honored in the law  
So future generation can appreciate  
What our State Legislators foresaw

Helping eco-friendly beavers  
Our family mission, that is true  
Better than the other options  
Of Beaver slippers or Eating Beaver stew!
