

Submitter: Rheama Koonce

On Behalf Of:

Committee: Senate Committee On Labor and Business

Measure: HB3213

I support the Bill HB 3213 - prohibiting manufacturers from selling or offering cosmetics developed through use of cosmetic animal testing.

I only purchase cosmetics who do NOT test on animals or use animal products. If I can't find any - then I do without. Why? Because we have evolved enough now in our humanity that we understand what is harmful to us and what is not. We do not need to continually test on animals to see the harmful results. We also can access many other alternative ingredients with a history of safety without subjecting innocent animals to torture testing a questionable ingredient.

Oh behalf of the Animal Kingdom - please pass this Bill!

Thank you!
