

Submitter: Glenn Gaither
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SJR33

When I see this kind of dark insanity being pushed on innocent children, I am reminded of my grandmother telling me how things unfolded in Nazi Germany. They also targeted children with a dark and destructive agenda.

For the past two years I have seen school counselors working to build dossiers on children and their family members, at the time I warned about the dangers of government looking for reasons to separate children from parents. Along with HB2002, this is a dark and sinister plan to harm our children. Ask yourself why they are attaching clinics to public schools, ask yourself why they want 10 year old children to have access to abortion care without parental consent, a ten year old pregnant girl is A RAPE victim, and parents need to know what's happened and who needs to spend life in prison. The school, the teachers union, state government don't want anyone to know a ten year old was raped? Sweep it under the rug.

I've spent two decades dealing with the most evil and vile vermin in our state prisons, many were sex offenders, now you want to work to erase evidence of a crime?

When I ran for office there were over a dozen school workers, OEA members, charged with sex crimes against minors, three in one day.

All you are doing is enabling pedophiles easier access to a child with a free pass to get rid of DNA evidence. I am particularly concerned that democrats, Senator Manning to be specific, wants children to legally share, self made pornography with friends, sexting.

It seems more each day, that some of these members, grown men and women, are too interested in sexualizing prepubescent minors and offering easy ways to cover up crimes and endanger children, of course I've seen this attitude now for two years.

Why are they pushing something they know will and should enrage parents.

Everyone knows how easy it is to manipulate a child, we don't need government to participate in that on a level on par with predators.
