

Submitter: Brian Ellin
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB3014

As a parent who bikes to school daily with our two elementary-age children, I'm writing to express my enthusiastic support for HB3014.

Commuting via bike is an act of joy, community, and empowerment that all children should have the opportunity to experience as part of their daily travel to and from school. HB3014 takes a positive step towards empowering schools across Oregon to support reliable access to safe and sustainable modes for all students.

It is important to show our children that we as a community are taking local and collective climate action and that by working together, we can decarbonize our transportation system — and through movements like the Bike Bus, we can all have fun doing it.

Sincerely,
Brian Ellin
