"HB 2976 A STAFF MEASURE SUMMARY
House Committee on Revenue"

<https://olis.oregonlegislature.gov/liz/2023R1/Downloads/CommitteeMeetingDocument/271550>

[HB 2976A] states, "SECTION 1. The Legislative Assembly finds and declares that:

(1) The development of a world-class distilled spirits industry is important to Oregon as a whole.

The vitality of the distilled spirits industry affects the well-being of Oregonians and Oregon's rural economies and environments."

The sentence, "***The vitality of the distilled spirits industry affects the well-being of Oregonians and Oregon's rural economies and environments.***"

Can the authors of [HB 2976A] prove the elements of the aforementioned sentence to be true or are the claims stated related to the warm afterglow of consuming some of the distilled spirits?

* [HB 2976 A] creates another "Board" and thereby unnecessarily increases the size of government.

**The distilled spirits industry relies on producing readily available superior products, at reasonable prices without any undo interferences from the Legislature and or the Oregon Liquor and Cannabis Commission.

David S. Wall

Mr. Oregon Concurr and says, "What kills people the most people; drugs or alcohol?"
