

Submitter: Kevin Starrett
On Behalf Of: The victims of your stupidity
Committee: Senate Committee On Judiciary
Measure: HB3443

It is not unamusing that the Democrats and their ignorant fellow travelers in the minority party would push a bill pretending to protect the victims of bias crimes while including a feature that will make it almost impossible for them to lawfully purchase a firearm to defend themselves.

But then, who wants victims to be able to defend themselves when they are better served as wards of the state? A state that does everything so well. (Unless you are still waiting on an unemployment check.)

Whether this element is the product of simple stupidity or is intended matters not. You were told about it and ignored it.

Those of us who support the right to self defense are laughing at the outcome and we are laughing at you.

By all means, pass this piece of garbage. We'll be chuckling from the wings.
